## SEBINO SpA: HISTORIC RECORD OF ORDERS SIGNED IN 2021 + 32% COMPARED TO 2020

Madone (BG), December 17, 2021 - Sebino S.p.A. ("Sebino" or "Company"), a leading system integrator in fire prevention and security systems, reports on the general trend of the business in 2021.

The Company informs that in 2021 orders, completed or to be carried out, were signed by the Parent Company for a total of approximately € 41.5 million, with an increase of approximately 32% on the same parameter in 2020 when the contracts signed were equal to € 31.5 million approximately.

The order backlog at the end of the current year is expected to amount to approximately € 29 million - of which approximately € 7 million relating to Romania – compared to nearly € 20 million at 31 December 2020, of which approximately 1.8 million relating to Romania.

**Gianluigi Mussinelli, Chief Executive Officer:** "A record year is about to close for the plant engineering division of Sebino. A further confirmation that the sector is in strong expansion driven not only by e-commerce but by other 3 important factors that have materialized also, and above all, due to the pandemic and the effects deriving from the increase in the prices of goods; the first factor is related to the "reshoring" activities from Asia of the production of goods, the second is the willingness of companies not to take risks on supply chain interruptions and the third is constituted by the increase in transport costs and also by the low availability of drivers. These circumstances are giving further impetus to the increasingly strategic sector of logistics throughout Europe. We are witnessing strategic choices of positioning of logistics hubs in our country by European companies that are leaders in their sectors. Lastly and on the subject of e-commerce, we note what recently appeared in the press about the will of the Russian e-commerce operator Ozon to expand in our country in 2022, the CEO says in fact "Italian companies will be able to place their products on our platform and we will provide logistics options for shipments to Russia and back". Sebino looks forward to the developments of this project with obvious interest "
